

Dear Parents,

Helping kids understand and apply mathematics knowledge and skills is a collective responsibility of parents, teachers, and principals.

Students need to learn mathematics in a way that will serve them throughout their lives. Understanding mathematics can provide our students with many job and career opportunities.

This is why students need to know why mathematics works the way it does, how to use it with confidence and competence when solving problems.

Understanding mathematics enables us to:

- Solve problems, make sound decisions and perform calculations with ease
- Explain how we solved a problem and why we made a particular decision
- Understand patterns and trends so that we can make predictions
- Understand Financial Literacy to manage time and money
- Handle everyday situations that involve numbers and feel confident

Before your child can learn mathematics, he or she needs to believe in his or her ability to do so. That's where you come in!

Parents, you are your child's first role model for learning. When you engage with your child in a supportive, relaxed atmosphere, your child will enjoy exploring the world of mathematics.

Dynamic Math is committed to helping parents and students. We understand that not everyone learns the same way, and not everyone feels the same about math. This is why we are continually working to create math resources that help students of all abilities, while supporting the many learning styles and varying levels of enthusiasm towards math.

From our clear concise instructions and straightforward guided examples to our additional practice material and tests, there's something to suit everyone. Combined with our video tutorials, students will be able to get a tutor-like experience from anywhere and at a fraction of the cost of standard tutoring or after-school help programs.

Table of Contents

BC Grade 8 Mathematics

	Page		Page
Unit 1 – Number Concepts		Unit 7 – Measurement	
1.1 Rational and Irrational Numbers	2	7.1 The Pythagorean Relationship	160
1.2 Two and Three Term Ratios	7	7.2 Areas and Perimeters of Quadrilaterals and Circles	165
1.3 Percent	11	7.3 Areas of Composite Figures	171
1.4 Square Root Concept	17	7.4 Volume of Solid Objects	177
1.5 Square Roots and Calculators	20	7.5 Surface Area and Volume of a Prism	180
1.6 Cubes of Numbers	23	7.6 Surface Area and Volume of a Cylinder	185
1.7 Rates	24		
1.8 Scientific Notation	28		
Unit 2 – Number Operations		Unit 8 – 2-D Shapes and 3-D Objects	
2.1 Operations with Fractions	37	8.1 Properties of Triangles	194
2.2 Operations with Decimals, Integers and Other Rationals	54	8.2 Lines and Corresponding Angles	201
2.3 Rate, Ratio and Proportion	72	8.3 Parallel Lines Cut by Transversals	205
2.4 Percent Problems	74	8.4 Quadrilaterals and Regular Polygons	209
		8.5 Properties of Quadrilaterals	213
Unit 3 – Financial Literacy		8.6 Using Nets to Build 3-D Objects	216
3.1 Unit Price	85	8.7 Isometric Dot Paper	217
3.2 Coupons	87	8.8 3-D Rod Designs in 2-Dimensions	221
3.3 Best Buy for Services	89		
Unit 4 – Patterns		Unit 9 – Statistics and Probability	
4.1 Variables and Relations	96	9.1 Measures of Central Tendency	238
4.2 Graphing with Tables of Values	103	9.2 Probability of an Independent Event	243
4.3 Translating Between Written and Algebraic Expressions	106	9.3 Independent Events and Sample Space	246
4.4 Generalizing Patterns and Problem-Solving	109	9.4 Probability of Two Independent Events	254
Unit 5 – Equations		Unit 10 – Curricular Competencies	
5.1 First-Degree Equations	119	10.1 Communicating	265
5.2 First-Degree Equations: Different Forms	122	10.2 Representing	270
Unit 6 – Problem Solving		10.3 Connecting	275
6.1 Using Diagrams to Solve Problems	140	10.4 Reasoning	279
6.2 Finding Relationships	144		
6.3 Organizing Information	148	Answers to Exercises and Tests	285
6.4 Interpreting Results	152		
		ABORIGINAL APPLICATIONS	
		End of Units 1, 2, 3, 4, 5, 6, 7, 8, 9
