CHAPTER

**1**

## Numbers to 10

1	Chapter Overview
4	Zero, One, Two, Three
6	Four, Five; Ordinal Numbers
8	Six, Seven, Eight, Nine
10	Ten; Even Numbers
12	<b>Chapter 1 Review</b> Math in the Home
14	<b>Kindergarten Review</b>

CHAPTER

**2**

## Numbers to 20

15	Chapter Overview
18	Eleven, Twelve
20	Thirteen, Fourteen; Ordinal Numbers
22	Fifteen, Sixteen; Pictograph
24	Seventeen, Eighteen; Bar Graph
26	Nineteen, Twenty; Even & Odd Numbers
28	<b>Chapter 2 Review</b> Math in the Home
30	<b>Cumulative Review</b>

CHAPTER

**3****Addition Facts to 6**

- 31 Chapter Overview
- 34 Complete Addition Sentences
- 36 Write Addition Sentences
- 38 Draw Pictures to Add
- 40 Vertical Form
- 42 Addition Names for 4, 5, and 6
- 44 Order of Addends
- 46 Chapter 3 Review**  
Math in the Home
- 48 Cumulative Review**

CHAPTER

**4****Place Value: Two-Digit Numbers**

- 49 Chapter Overview
- 52 Tens & Ones in Numbers to 50
- 54 Expanded Form; Even & Odd
- 56 Greater Than & Less Than
- 58 Tens & Ones in Numbers to 100
- 60 Greater Than & Less Than with Numbers to 100
- 62 Count by 1s, 5s & 10s
- 64 Chapter 4 Review**  
Math in the Home
- 66 Introducing Hundreds
- 68 More Hundreds
- 70 Cumulative Review**

CHAPTER

**5****Subtraction Facts to 6**

- 71 Chapter Overview
- 74 Beginning Subtraction
- 76 Subtraction Sentences
- 78 Cross Out to Subtract
- 80 Vertical Subtraction
- 82 Related Subtraction Facts
- 84 Number Names
- 86 Chapter 5 Review**  
Math in the Home
- 88 Cumulative Review**

CHAPTER

**6****Money**

- 89 Chapter Overview
- 92 Penny, Nickel, Dime
- 94 Coin Collections
- 96 Counting Dimes & Pennies
- 98 Probability;  
Counting Nickels & Dimes
- 100 Chapter 6 Review**  
Math in the Home
- 102 Cumulative Review**

CHAPTER

7

## Addition Facts to 12

- 103 Chapter Overview
- 106 Count on 1 or 2
- 108 Zero & Order Principles
- 110 Add on Number Line;  
Double Facts
- 112 3 Addends
- 114 Add with 5
- 116 Names for 10
- 118 Chapter 7 Review**  
Math in the Home
- 120 Cumulative Review**

CHAPTER

8

## Time & Calendar

- 121 Chapter Overview
- 124 Order Events: Tell Time
- 126 Writing Time to the Hour;  
Reading Digital Time
- 128 Read a Table;  
Tell Hours Passed
- 130 Time to the Half-hour
- 132 Time to the Hour & Half-hour;  
Time Passed
- 134 Calendar
- 136 Chapter 8 Review**  
Math in the Home
- 138 Cumulative Review**

CHAPTER

9

## Fractions

- 139 Chapter Overview
- 142 Equal Parts: Halves
- 144 Thirds
- 146 Fourths
- 148 Part of a Set
- 150 Fair Shares
- 152 Probability; Tally Marks
- 154 Chapter 9 Review**  
Math in the Home
- 156 Cumulative Review**

CHAPTER

10

## Subtraction Facts to 12

- 157 Chapter Overview
- 160 Count Back 1 or 2; Subtract 0
- 162 Subtract All;  
Subtract Nearly All
- 164 Compare to Subtract; Doubles
- 166 Missing Addend;  
Subtract from 10
- 168 Fact Families
- 170 Fact Families for 11;  
Missing Addend
- 172 Fact Families for 12;  
Missing Addend
- 174 Chapter 10 Review**  
Math in the Home
- 176 Cumulative Review**

CHAPTER

11

## Customary Measurement

- 177 Chapter Overview
- 180 Measure in Paper Clips & Inches
- 182 Estimate & Measure in Inches
- 184 Cups & Pints
- 186 Pints, Quarts & Gallons
- 188 More Than or Less Than a Pound
- 190 Read a Thermometer
- 192 Chapter 11 Review**  
Math in the Home
- 194 Cumulative Review**

CHAPTER

12

## Addition: Two-Digit Numbers

- 195 Chapter Overview
- 198 Add the Ones First
- 200 Two-Digit Addition
- 202 Adding Dimes & Pennies
- 204 Money Addition
- 206 Chapter 12 Review**
- Math in the Home
- 208 Rename 10 Ones
- 210 Rename 10 Pennies
- 212 Cumulative Review**

CHAPTER

13

## Subtraction: Two-Digit Numbers

- 213 Chapter Overview
- 216 Subtract the Ones First
- 218 Two-Digit Subtraction
- 220 Subtract the Pennies First
- 222 Subtracting Money
- 224 Chapter 13 Review**
- Math in the Home
- 226 Cumulative Review**

CHAPTER

14

## Money

- 227 Chapter Overview
- 230 Count Dimes or Nickels with Pennies
- 232 Count Dimes, Nickels & Pennies
- 234 Probability; Count Dimes, Nickels & Pennies
- 236 Quarters
- 238 Chapter 14 Review**
- Math in the Home
- 240 Cumulative Review**

CHAPTER

15

## Geometry

- 241 Chapter Overview
- 244 Solid Figures
- 246 More Solid Figures
- 248 Faces, Curves & Corners
- 250 Plane Figures
- 252 Same Shape, Size, or Color
- 254 Symmetry
- 256 Patterns
- 258 Chapter 15 Review**
- Math in the Home
- 260 Cumulative Review**

CHAPTER

16

## Place Value: Three-Digit Numbers

- 261 Chapter Overview
- 264 Hundreds, Tens, Ones
- 266 Missing Numbers
- 268 Writing Numbers to 1,000
- 270 Place Value
- 272 1 More, 1 Less; 10 More, 10 Less
- 274 Comparing Numbers
- 276 Chapter 16 Review**
- Math in the Home
- 278 Adding Large Numbers
- 280 Adding More Large Numbers
- 282 Cumulative Review**

CHAPTER

**17****Metric Measurement**

- 283 Chapter Overview
- 286 Measure in Centimeters
- 288 Estimate & Measure in Centimeters
- 290 Liter
- 292 Kilogram
- 294 Read a Celsius Thermometer
- 296 Measure Perimeter
- 298 Chapter 17 Review**  
Math in the Home
- 300 Cumulative Review**

CHAPTER

**18****Addition & Subtraction Facts**

- 301 Chapter Overview
- 304 Add Doubles
- 306 Add Near Doubles
- 308 Add 9 or 10
- 310 Add 6, 7, 8
- 312 3 Addends
- 314 Double Fact Families
- 316 Fact Families for 13, 14;  
Missing Addend
- 318 Fact Families for 15, 16
- 320 Fact Families for 17, 18;  
Multi-step Problems
- 322 Chapter 18 Review**  
Math in the Home
- 324 Cumulative Review**

CHAPTER

**19****Money**

- 325 Chapter Overview
- 328 Count Pennies with a Quarter
- 330 Count Nickels with a Quarter
- 332 Count Dimes with a Quarter
- 334 Count with 2 Quarters
- 336 Chapter 19 Review**  
Math in the Home
- 338 Equal Sets
- 340 Repeated Addition
- 342 Writing Repeated Addition  
Equations
- 344 Cumulative Review**

CHAPTER

**20****Time & Calendar**

- 345 Chapter Overview
- 348 Time to the Hour & Half-hour
- 350 Time to 5 Minutes
- 352 Time to 5 Minutes;  
Time Passed
- 354 Calendar
- 356 Chapter 20 Review**  
Math in the Home
- 358 Cumulative Review**

CHAPTER

**21****Addition:  
Three-Digit  
Numbers**

- 359 Chapter Overview
- 362 Add the Hundreds
- 364 More Addition Practice
- 366 Addition Check-up
- 368 Chapter 21 Review**  
Math in the Home
- 370 Rename 10 Ones
- 372 More Renaming
- 374 Cumulative Review**

# Sample Lesson

Objectives point out the skills to teach in the lesson.

Teach for Understanding and Check for Understanding provide effective procedures for explaining math concepts, using manipulatives, and encouraging problem solving.

Materials list items to collect or prepare ahead of time.

Practice and Review provides activities for practicing skills—such as counting, number recognition, and fact memorization—and for reviewing concepts.

**LESSON** 63 **Worktext** pages 133–34 **Correlated Math Reviews** pages 131–32

**Objectives**

- Identify equal parts.
- Determine the fair share for 2, 3, and 4 people.

**Teacher Materials**

- Money Kit: 12 pennies, 9 nickels, 6 dimes
- Food items such as an apple, a graham cracker, a slice of bread, a candy bar or Food Pictures transparencies (from Lesson 59)
- Cut the food items or draw lines to divide the Food Pictures into 2, 3, or 4 equal and unequal parts
- Addition flashcards:  $8 + 3$ ,  $3 + 8$ , and previously memorized addition facts

**Student Materials**

- Number Cards 9–12
- Counters: 12 cars
- Cheerios in a paper cup for each pair of students
- A napkin for each student

## Practice and Review

### Determine the value of a set of coins

- Display 4 nickels and 4 pennies in random order.
  - What steps should we take in counting these coins? *separate the coins into nickels and pennies, count the nickels by 5s, and then count on the pennies by 1s.*
- Lead in counting the coins: 5, 10, 15, 20. (*deep breath*) 21, 22, 23 Repeat the procedure for other combinations of nickels and pennies.
- Display 4 dimes and 7 pennies in random order.
  - What steps should we take in counting these coins? *separate the coins into dimes and pennies, count the dimes by 10s, and then count on the pennies by 1s.*
- Lead the students in counting the coins: 10, 20, 30. (*deep breath*) 31, 32, 33, 34, 35, 36, 37 Repeat the procedure for other combinations of dimes and pennies.

### Memorize addition facts: $8 + 3$ , $3 + 8$

- Display the new flashcards slowly, one at a time. Select volunteers to give the answers.
- Distribute Number Cards 9–12. Display each flashcard again. Direct the students to hold up the correct Number Card for each answer.
- Practice these and the previously memorized addition facts several times.

## Introduce the Lesson

- Arrange the students in pairs. Distribute 2 napkins and a paper cup with a small amount of Cheerios in it to each pair of students. Read aloud this word problem.

Digit bought some doughnuts at the bakery. He wants to share the doughnuts equally with Cecilia. How can he find out what a **fair share** will be?

- Instruct one student in each pair to share the doughnuts (if Cheerios) equally with his partner.
  - How did you decide what a fair share would be? *possible answer: distribute 1 piece of cereal at a time, alternating between the students in the pair.*
  - Did anyone have a doughnut (Cheerios) left over? What did you do with it? *Answers will vary.*

## Teach for Understanding

### Identify equal parts

- What does *equal parts* mean? *Answers may vary.*
- Elicit that *equal parts* means that an object or group of objects is divided into parts that are the same size. Point out that if there is a treat to be shared by 2 or more people, it is fair for each person to receive the same amount. *Fair shares are equal parts.*
  - Display the food items (or Food Pictures) that have been divided. Point to each item and direct the students to stand if they think it is divided into equal parts.

### Determine the fair share for 2, 3, and 4 people

- Display 6 dimes as you read aloud this word problem.

Andrea collected 6 dimes. She wants to give her dimes to her 2 little sisters. How many dimes make a fair share for each little sister?

- How many people will share the dimes? 2
  - How many dimes are they sharing? 6
- Select 3 volunteers to be Andrea and her 2 sisters. Direct them to role-play this story: Andrea should take turns giving 1 dime to each "sister" until all the dimes are gone.
    - How many dimes make a fair share for each of the 2 sisters? 3 dimes
  - Point out that when we share what we have with others, we show Christlikeness. [Bible Story: Sharing] God shared His Son, Jesus, with us, even though we did not deserve it.
    - Why don't we deserve what Jesus did for us? *We are sinners.*
    - Why did God share His Son? *because of His great love for us.* [Bible Story: Sa Love]
  - Continue to role-play using pennies, nickels, and dimes to find the fair share.
    - 8 nickels shared with 2 children *fair share = 4 nickels*
    - 9 nickels shared with 3 children *fair share = 3 nickels*
    - 12 pennies shared with 4 children *fair share = 3 pennies*

### Make fair shares for 2, 3, and 4 people

- Distribute the cars for each student to use in making fair shares.

Cameron and Lewis are making a parking garage with blocks and toy cars. They have 12 toy cars to share with each other. How many cars make a fair share for each boy?

- How many people will share the cars? 2
  - How many cars are they sharing? 12
- Direct each student to make a set of 12 cars and then divide the set to make fair shares for 2 people.
    - How many cars make a fair share? 6

Chapter 9: Fractions

Introduce the Lesson broadens the student's knowledge and interest in the community theme or initiates a discussion to cultivate biblical principles.

Encourage a Christian worldview by teaching biblical principles using Scripture, Bible Action Truths, and Bible Promises. Appendix pages A3–A5 provide explanations of Bible Action Truths and Bible Promises.

Worktext pages provide practice of math skills and a tool to evaluate understanding.

### Fair Shares

Name \_\_\_\_\_

Each gingerbread man has a fair share. Each has the same amount.

Circle the fair share for each child. Write the number each child gets.

2 children get 2 each. 3 children get 2 each.

3 children get 3 each. 4 children get 2 each.

2 children get 3 each. 4 children get 3 each.

Circle the fair share for each child. Write the number each child gets.

3 children get 4 each. 2 children get 3 each.

4 children get 3 each. 3 children get 3 each.

3 children get 5 each. 4 children get 2 each.

Ronald wants to help Cameron and Lewis make the parking garage. Cameron and Lewis want to share the 12 toy cars with Ronald. How many cars make a fair share for each of the 3 boys?

- ▶ How many cars are they sharing? 12
- ▶ Direct each student to make a set of 12 cars and then divide the set to make fair shares for 3 people.
- ▶ How many cars make a fair share? 4
- ▶ How many cars would make a fair share if a fourth person came to play? 3
- ▶ What happens to the number of cars each person gets to play with (the fair share) as more people come to play?

*Possible answers: Each person gets fewer cars. The fair share is less.*

**Worktext pages 133–34**

Read aloud and discuss the information at the top of page 133. Read and explain the directions for the pages. Instruct the students to complete the pages.

### Extended Activity

**Make fair shares**

**Materials**

- A small box of raisins (or a small bag of candy) for each group

**Procedure**

Arrange the class into equal groups. Give each group a box of raisins. Direct one student in each group to open the box and lead his group in counting the raisins. Instruct each group to decide how best to divide the raisins so that each person in the group receives a fair share. Direct another student to distribute the raisins fairly among the members of his group. Circulate among the groups; ask them to explain their procedure and check to see whether they made fair shares. Allow the students to eat their raisins.

10c 20c 30c 40c 50c — 50c

5c 10c 15c 16c 17c — 17c

one hundred thirty three 133

one hundred thirty four 134

Time to Review provides systematic review of skills and concepts in the Worktext.

Extended Activities enhance the lessons with optional practice. Many activities can be used in learning centers.

Encourage the student's understanding of math by asking questions (interactive teaching) and promoting critical thinking.

Involve the student in active learning by providing manipulatives.
