Teaching Tips	xiii
New to This Edition	xv
Lesson Plan Overview	xvi

## 1 Numbers to 20

- 1 Chapter Overview
- 4 Zero–Ten
- 6 Compare Numbers to 10
- 8 Ten
- 10 Eleven & Twelve
- 12 Thirteen–Nineteen
- 14 Compare Numbers to 19
- 16 Twenty
- 18 Chapter 1 Review
- 20 Kindergarten Review

## 2 Addition Facts to 6

- 21 Chapter Overview
- 24 Addition Readiness
- 26 Add Zero
- 28 Addition Sentences
- 30 Illustrate an Addition Sentence
- 32 Addition in Vertical Form
- 34 Order of Addends
- 36 Combinations for 4, 5 & 6
- 38 Chapter 2 Review
- 40 Cumulative Review

## 3 Place Value: 2-Digit Numbers

- 41 Chapter Overview
- 44 Decade Numbers to 100
- 46 Tens & Ones; Numbers to 29
- 48 Tens & Ones; Numbers to 39
- 50 Compare Numbers; Numbers to 49
- 52 Tens & Ones; Numbers to 59
- 54 Compare Numbers; Numbers to 79
- 56 Count to 100 by 1s, by 5s & by 10s
- 58 Chapter 3 Review
- 60 Cumulative Review

## 4 Subtraction Facts to 6

- 61 Chapter Overview
- 64 Cross Out to Subtract
- 66 Subtract 0
- 68 Draw Pictures to Subtract
- 70 Subtraction in Vertical Form
- 72 Related Subtraction Facts
- 74 More Subtraction
- 76 Chapter 4 Review
- 78 Cumulative Review

## 5 Data

- 79 Chapter Overview
- 82 Tally Charts
- 84 Picture Graphs
- 86 Bar Graphs
- 88 Chapter 5 Review
- 90 Cumulative Review

## 6 Money

- 91 Chapter Overview
- 94 Pennies, Nickels & Dimes
- 96 Sets of Coins
- 98 Count by 1s, by 5s & by 10s
- 100 Count Dimes & Pennies
- 102 Count Dimes, Nickels & Pennies
- 104 Chapter 6 Review
- 106 Cumulative Review

## 7 Addition Facts to 12

- 107 Chapter Overview
- 110 Addends & Sum
- 112 Addition Rules
- 114 Add on a Number Line; Add Doubles
- 116 Add to 5
- 118 Combinations for 10
- 120 3 Addends
- 122 Chapter 7 Review
- 124 Cumulative Review

## 8 Time & Calendars

- 125 Chapter Overview
- 128 Tell Time
- 130 Time to the Hour
- 132 Tell Hours Passed
- 134 Time to the Half-Hour
- 136 Order Events
- 138 Calendars
- 140 Chapter 8 Review
- 142 Cumulative Review

## 9 Fractions

- 143 Chapter Overview
- 146 Equal Parts
- 148 Halves
- 150 Fourths
- 152 Fourths & Quarters
- 154 Part of a Set
- 156 Equal Shares
- 158 Chapter 9 Review
- 160 Cumulative Review

## 10 Subtraction Facts to 12

- 161 Chapter Overview
- 164 *Count Back* 1 or 2; Subtract 0
- 166 Subtract All or Nearly All
- 168 Compare Sets
- 170 Missing Addend; Subtract from 10
- 172 Fact Families
- 174 Fact Families for 11
- 176 Fact Families for 12
- 178 Chapter 10 Review
- 180 Cumulative Review

## 11 Geometry: Plane Figures

- 181 Chapter Overview
- 184 Attributes of Shapes
- 186 Draw Shapes
- 188 Composite Shapes
- 190 Compose Shapes
- 192 Chapter 11 Review
- 194 Cumulative Review

## 12 Addition of 2-Digit Numbers

- 195 Chapter Overview
- 198 Group to Add
- 200 Add Ones & Add Tens
- 202 2-Digit Addition
- 204 More 2-Digit Addition
- 206 Rename 10 Ones

- 208 More Renaming
- 210 Chapter 12 Review
- 212 Cumulative Review

### **13** Subtraction of 2-Digit Numbers

- 213 Chapter Overview
- 216 Subtract Ones & Subtract Tens
- 218 2-Digit Subtraction
- 220 Subtract Money
- 222 More 2-Digit Subtraction
- 224 Chapter 13 Review
- 226 Cumulative Review

### **14** Measurement: Length, Height & Temperature

- 227 Chapter Overview
- 230 Count Units of Measure
- 232 Measure Length
- 234 Measure Height
- 236 Measure Using Rulers
- 238 Compare Measurements
- 240 Order Objects
- 242 Read a Thermometer
- 244 Chapter 14 Review
- 246 Cumulative Review

### **15** Geometry: Solid Figures

- 247 Chapter Overview
- 250 Flat & Curved Surfaces
- 252 Spheres
- 254 Rectangular Prisms & Cubes
- 256 Cylinders & Cones
- 258 Compose Solid Figures
- 260 Shape Attributes
- 262 Extend Patterns
- 264 Chapter 15 Review
- 266 Cumulative Review

### **16** Place Value: 3-Digit Numbers

- 267 Chapter Overview
- 270 Hundreds, Tens & Ones
- 272 3-Digit Numbers
- 274 3-Digit Place Value
- 276 1 More & 1 Less
- 278 10 More & 10 Less
- 280 Compare 3-Digit Numbers
- 282 3-Digit Addition
- 284 Chapter 16 Review
- 286 Cumulative Review

### **17** Measurement: Weight & Capacity

- 287 Chapter Overview
- 290 Weight: More or Less
- 292 Compare Weight
- 294 Weight: Heavier or Lighter
- 296 Capacity: More or Less
- 298 Compare Capacity
- 300 Measurement Tools
- 302 Chapter 17 Review
- 304 Cumulative Review

### **18** Addition & Subtraction Facts to 18

- 305 Chapter Overview
- 308 Add Doubles
- 310 Add Near Doubles
- 312 Add to 10
- 314 Add to 10
- 316 3 Addends
- 318 Fact Families for Doubles
- 320 Fact Families for 13 & 14; Missing Addend
- 322 Fact Families for 15 & 16
- 324 Fact Families for 17 & 18; Problem Solving
- 326 Chapter 18 Review
- 328 Cumulative Review

## 19 Money

- 329 Chapter Overview
- 332 Count Quarters & Pennies
- 334 Compare Nickels & Quarters
- 336 Count Quarters & Dimes
- 338 One Hundred Cents
- 340 Chapter 19 Review
- 342 Cumulative Review

## 20 Time & Calendars

- 343 Chapter Overview
- 346 Time to the Half-Hour
- 348 Elapsed Time
- 350 More Elapsed Time
- 352 Order Time & Events
- 354 Estimate Time
- 356 Calendars
- 358 Chapter 20 Review
- 360 Cumulative Review

## 21 Addition & Subtraction with Renaming

- 361 Chapter Overview
- 364 Combine to Make 10
- 366 Group and Rename
- 368 Rename to Add
- 370 Rename to Add
- 372 Ungroup and Rename
- 374 Rename to Subtract
- 376 Check Subtraction with Addition
- 378 Chapter 21 Review
- 380 Cumulative Review

## 22 Math Review

- 381 Chapter Overview
- 384 Count to 120
- 386 Compare Numbers
- 388 Shapes

- 390 Measurement
- 392 Equal Parts
- 394 Time; Charts & Graphs
- 396 Addition & Subtraction
- 398 2-Digit Addition
- 400 Rename to Add
- 402 More Addition & Subtraction
- 404 Story Problems

## Appendix

- A2 Bible Action Truths
- A4 Bible Promises
- A5 Explaining the Gospel
- A6 Manipulative Alternatives
- A7 Material Preparation
- A7 Manipulative Management
- A8 PreCursive Number Strokes
- A9 Guide for Math Facts
- A10 Fact Fun Activities
- A12 Addition & Subtraction Facts Chart
- A15 Songs
- A28 Math Background
- A37 Worktext Index
- A41 Teacher's Edition Index
- A43 Photo Credits
- A46 How to Use the Teacher's Toolkit CD

## Teacher's Toolkit CD

- To the Teacher
- Worktext Answer Key
- Reviews Answer Key
- Tests with Coins (in color)
- Visuals (from the Teacher's Visual Packet)
- Instructional Aids
- Math Board Suggestions
- Assessments
- Fact Reviews
- Fact Flashcards
- Extended Activities
- Enrichment Activities
- Group Work Rubric

# Lesson Features

Objectives point out the skills to teach in the lesson.

The Materials section lists items to collect or prepare ahead of time.

Practice and Review provides activities for practicing previously taught skills, such as counting objects and number recognition. Review of concepts can occur any time during the day.

Teach for Understanding and Check for Understanding provide effective procedures for explaining math concepts, using manipulatives, and promoting problem solving using critical-thinking skills.

Involve the students in interactive learning through discussion that encourages them to construct reasonable proof for their solutions.

## Lesson 125 Worktext pages 281–82 Reviews pages 249–50

### Objectives

- Follow the Problem Solving Plan to solve an addition word problem with 3-digit numbers.

- Add 3-digit numbers without renaming.

### Teacher Materials and Manipulatives

- Chart 1, 22; Hundred Chart (extended); Problem Solving Plan
- Place Value Kit: 3 hundreds, 9 tens, 6 ones
- Hundreds/Tens/Ones Frame (Teacher's Toolkit CD)

### Student Materials and Manipulatives

- Place Value Kit: 3 hundreds, 9 tens, 6 ones
- Hundreds/Tens/Ones Frame

### Practice and Review

#### Practice addition facts

- Review all previously introduced addition facts. See the Chapter Overview for a variety of practice ideas.

#### Count on by 10s from a 2-digit number

- Point to the number 10 on the extended Hundred Chart. Lead the students in counting from 10 to 150 by 10s, pointing to each number as it is counted.

### Teach for Understanding

#### Lesson Focus

In this lesson you will add 3-digit numbers by adding ones to ones, tens to tens, and hundreds to hundreds.

#### Follow the Problem Solving Plan to solve an addition word problem with 3-digit numbers

- Display the Problem Solving Plan chart and remind the students that solving story problems is made easier by following a plan.

- Distribute a Hundreds/Tens/Ones Frame, 3 hundreds, 9 tens, and 6 ones to each student. Display the Hundreds/Tens/Ones Frame page and model the steps with your manipulatives.

- Guide the students in solving the following story problem using the Problem Solving Plan: read the story once to allow them to determine what the question is asking and then read it again, pausing after each sentence to discuss the information.

Sam and his brother deliver newspapers each day. On Sunday they deliver 153 newspapers. On Monday they deliver 142 newspapers. How many newspapers do the boys deliver in 2 days?

**What is the question?** How many newspapers do the boys deliver in 2 days?

**What information is given?** On Sunday they deliver 153 papers, and on Monday they deliver 142 papers.

- Direct the students to picture the number of papers delivered on Sunday at the top of the frame. Display 1 hundred, 5 tens, and 3 ones on your frame.

- Direct the students to picture the number of papers delivered on Monday at the bottom of the frame. Display 1 hundred, 4 tens, and 2 ones on your frame.

Do you add or subtract to find the answer? Add. How do you know? I used to join sets to find the total number of papers delivered in 2 days.

What addition problem could you set up to help you solve the problem?  $153 + 142 = \dots$

- Draw a Hundreds/Tens/Ones Frame for display and write " $153 + 142 = \dots$ " in vertical form inside the frame.

How can these numbers be added? Add (join) the ones, tens, and hundreds.

- Explain that the students can apply what they know about adding 2-digit numbers to adding 3-digit numbers. Remind them they learned to join ones to ones and tens to tens. Since these numbers also have hundreds, they will join hundreds to hundreds as well.

- Direct each student to move all the ones on his frame together as you demonstrate.

How many ones are there in all? 5 ones

- Direct each student to move all the tens together as you demonstrate.

How many tens are there in all? 9 tens

- Direct each student to move all the hundreds together as you demonstrate.

How many hundreds are there in all? 2 hundreds

What number is represented when the 2 sets are joined? 295

Does the answer make sense? Yes. Why? 295 is larger than either addend. There is 1 hundred in each addend, so I know the answer is 200 and some more.

- Guide the students in adding ones to ones, tens to tens, and hundreds to hundreds to solve the vertical addition problem. How many newspapers do the boys deliver in 2 days? The boys deliver 295 newspapers in 2 days.

- Sam and his brother were given 300 newspapers, would they have fewer papers than they needed, more papers than they needed, or just the right number of papers? 300 is more than 295, so they would have more papers than they needed.

Do you think it would be a good idea to have some extra papers to carry with them? Accept any answer and allow students to explain their reasoning.

- Use a similar procedure for the following story problem. Emphasize adding ones to ones, tens to tens, and hundreds to hundreds.

Digit collected data from the people in Madison. He asked them whether they read the news online or in a newspaper. 261 people said they read the news online. 115 people said they read a newspaper. How many people did Digit survey?  $261 + 115 = 376$ . Digit surveyed 376 people.

- Invite a student to explain why the answer makes sense using number reasoning. 376 is larger than either addend. I know the answer will be 300 and some more because one addend has 2 hundreds and the other addend has 1 hundred.

Newspapers are made from trees that have been cut down and made into paper. There are 500,000 trees cut each week to make the Sunday newspapers. That is a lot more than 500. In fact, you would have to count to 900 more than 500 times to get to 500,000.

The Lesson Focus prepares the students for what they will learn in the lesson.

Reduced Worktext pages provide solutions. Use these pages to evaluate student progress and to determine where more guidance is needed.

A variety of activities allows the students to see math at work in real-life contexts.

### 3-Digit Addition

Complete the addition problems.

1. 

214	+ 132	346
-----	-------	-----

How many ones would it take to picture each number?

2. 

200	+ 300	500
-----	-------	-----

3. 

325	+ 100	425
-----	-------	-----

4. 

110	+ 20	130
-----	------	-----

Use the clues to picture and write the numbers.

5. 100 Less Than 300 200

6. 100 More Than 300 400

Write an addition problem for the story. Complete the sentence.

7. Juan gave out 212 flares for the Easter service. Mary gave out 124 flares. How many flares did they give out in all? 336 flares.

Use the clues to picture and write the numbers.

1. 

128	+ 129	257
-----	-------	-----

138 228

Circle the number that matches the clue.

2. 7 in the Ones place: 701  707

3. 6 in the Tens place: 635  356

4. 3 in the Hundreds place:  347 800

Mark the value of the underlined digit.

5. 428  400  40  4

6. 190  900  90  9

7. 956  900  90  9

**Time to Review**

Count by 10s. Write the missing numbers. Draw ten and ones to picture each missing number.

8. 

5	15	25	35	45	55	65	75
---	----	----	----	----	----	----	----

Time to Review exercises provide systematic review of skills and concepts.

What do people do with the newspaper when they are finished reading it? **possible answers: throw it away, recycle it, use it to line the litter box, use it to cover a surface when doing a messy job, use it to pack breakable items.** Numbers are a part of just about everything we do every day. Understanding numbers helps us to make better choices and become better stewards of God's creation. Knowing the number of trees it takes to make the Sunday newspaper can help us to be more responsible with the paper when we are done reading it. Recycling it or finding other uses for it, rather than simply throwing it away, makes us better stewards of the world God created. Reading online is also a good option if that is available.

**Add 3-digit numbers without renaming**

- Draw a Hundreds/Tens/Ones Frame for display and write "123 + 234 = \_\_\_\_" in vertical form inside the frame. How do you think you could solve this 3-digit addition problem? **add ones to ones, tens to tens, and hundreds to hundreds.**
- Lead the students in adding the ones first, the tens next, and the hundreds last and write the sum (357) for display.
- Write the following problems in drawn Hundreds/Tens/Ones Frames for display:
 

214	726	512
+ 187	+ 153	+ 473
= 401	= 879	= 985

- Invite a volunteer to demonstrate solving each written problem. Encourage the students to check that their answers make sense.
- Worktext pages 281-82**
- Remind the students that adding 3-digit numbers uses the same principles as adding 2-digit numbers. When adding 3-digit numbers, ones are added to ones, tens are added to tens, and hundreds are added to hundreds.
  - Read and guide completion of page 281. Direct attention to the discussion question and encourage the students to tell how many ones would be displayed for each problem.
  - Read and explain the directions for page 282. Assist the students as they complete the page independently.

Group work promotes collaborative learning. Students learn by working together as a whole class and sometimes by working in smaller groups.

Encourage a Christian worldview by discussing real-life situations to show the students that math is a powerful tool for exercising dominion over the earth as commanded in Genesis 1:28.

## New to This Edition

1. The goal of this book is to advance the math understanding of every student in your classroom. Since students have diverse needs and learning styles, this book places increased emphasis on implementing differentiated instruction. Changes include more group work, which allows collaboration among peers. For optimal learning for all students, each group should include students with varying strengths and abilities. Groups may vary for each instructional strand. Students who are reluctant to respond in large groups will often participate in small groups. The use of manipulatives and strategies is emphasized throughout to help your students grow their math knowledge and demonstrate their thinking.
2. The Teacher Notes section in the front of each chapter details the learning objectives for the chapter. This section includes background information, indicates what knowledge the chapter is building on, and gives other helpful information that pertains to the chapter. On this page you will also find math board suggestions, which are review activities designed to be used any time of day. This review time focuses on core concepts and provides an excellent opportunity for you to find areas where your students would benefit from additional teaching or practice. Also included are ideas for helping a student who may need individual help.
3. Studies show that retention increases by 23 percent when students know what learning is expected of them. This book offers a Lesson Focus for every lesson. This statement is to be conveyed to your students before the lesson begins. In some cases the Lesson Focus explains a process the students will use to learn a new skill; in other lessons it explains how previous knowledge will be applied to a new concept.
4. To help your students become lifelong problem-solvers, more focus has been placed on processing word problems. Encourage the students to become active listeners by asking them to listen for who the problem is about and what action is taking place as you read through the word problem the first time. As you reread the problem one sentence at a time, encourage your students to picture the problem with manipulatives or drawings. After all sentences have been reread and the picture is complete, ask the students to translate the picture into a number sentence and retell the story in their own words. Making a picture helps the students make sense of their number sentence. Finally, a summary sentence should be crafted to explain the solution.
5. Answers to questions are modeled with full answers using math terminology from the lesson. It may take additional questioning to draw more complete answers and explanations from your students at the beginning of the year. A pattern is established in the lessons of asking students to explain their answers or reasoning. You will notice that the reasoning is often included in answers even when the question does not specifically ask for it. It is expected that the students will give their reasoning for all answers where appropriate. Taking time to listen to students explain their answers provides insight to their reasoning and can help you strengthen their thinking or clear up any misconceptions they may have. A gear icon (⚙️) is used to help you identify the higher-level thinking questions within the lessons. Supply any prompts or background needed to guide the students to the answer. Worktext pages often have discussion questions in blue think bubbles. These questions are intended to engage your students in math discussions that lead them to a deeper level of math understanding and further develop their reasoning abilities.
6. Provide a safe, loving, and positive learning environment that encourages students to participate in the learning process. Remember that each student is made in God's image (Genesis 1:26–27). Circulate among the students as they work, gently guiding them to correct thinking and giving individual attention as needed. Praise students who work diligently to learn and those who model good behavior and a helpful spirit. Many real-life connections for math are made as Digit volunteers at different businesses in the Madison community. Teach your students that God provides many opportunities for them to help others and that they should desire to be diligent in their work and to portray Christ's love and grace to those around them.
